

PROJECT: Mini-Market Sales Data Cleaning
DATE: 2026-05-[today]
ANALYST: [Your name]
FILE CLEANED: working_2026-05-market_sales

BEFORE CLEANING — PROBLEMS FOUND:

1. Row 7 was completely blank — deleted
2. Country column had 4 spellings:
"Nigeria", "NIG", "NIGERIA", "nigeria"
3. Sales column Row 4 was empty (missing value)
4. Sales column had "abc" in one row
(wrong data type)
5. Date 2026-05-07 appeared twice
(possible duplicate)

AFTER CLEANING — CHANGES MADE:

1. Blank row deleted
2. All country spellings standardized to "Nigeria"
3. Missing sales values flagged as "missing"
4. "abc" replaced with "missing"
5. Duplicate dates flagged as "duplicate_check"
— awaiting client confirmation before deletion
6. Column names renamed:
Date → date
Sales → sales_amount
Country → customer_country
Category → product_category

IMPORTANT NOTE TO CLIENT:

2 rows flagged as "duplicate_check" for
date 2026-05-07. Please confirm:
- Was this date entered twice by mistake?
- Or were there 2 separate transactions
on this day?
